TRAINING

Red & White Skill Education (July 2026 - Present)

- Currently undergoing training in Web Development.
- Learning HTML, CSS, Bootstrap, Responsive Web Design, and basic JavaScript.
- Developing responsive and user-friendly websites through practical projects.

PROJECTS

- **Personal Portfolio Website** [Live Link](#)

A personal portfolio website showcasing my skills, projects, and web development work using HTML, CSS, and Bootstrap.

- **StyleCo – Fashion** [Live Link](#)

Developed a responsive fashion e-commerce landing page with a modern user-friendly design, featuring product collections, categories, brand showcase, customer reviews, promotional sections, newsletter, and responsive navigation using Bootstrap.

- **Responsive Landing Page** [Live Link](#)

Designed and developed a fully responsive landing page with a structured header, navigation bar, hero section, content sections, and footer. Used CSS and media queries to make the website responsive and user-friendly across desktop, tablet, and mobile devices.

- **Age Count** [Live Link](#)

Built an Age Count web application using HTML, Bootstrap, and JavaScript to calculate current age and display the days remaining until the next birthday.
